Advanced Cooling Technology

Thermal vias carry (holes on board) heat away from LED chips, providing an enhanced thermal path for heat flow. The anodised aluminium housing in conjunction with the low resistance thermal material decreases the temperature of LEDs which helps to prolong the life span of the LED tube to over 50,000 hours

An amazing combination of price and performance. Built upon technical innovations in optical, electronics, mechanical and thermal design, the CR Series provides amazing color accuracy and advanced dimming capabilities.

The high quality flat panels utilize the latest high power white LED technology for a practical solution to general overhead room and office lighting. A number of color temperature options are available to suit the environment, such as warm white for the relaxing "warm glow" of incandescent bulbs or cool white for clear illumination.

Downlight Anti-fogging feature as fashion appearance, soft and gentle light, with lifespan 50000 hours, has wide application including hotel, office and shops, etc. Our LED downlights are direct replacements of traditional downlights. We provide high-quality LED Down lights and competitive price.

Square shape, easily integrated with indoor space.
Slice-type heat sink fin design, make lamp lighter.
High quality PC surface cover, high light output, soft and gentle light.

INNOVATIVE LIGHTING

Motion Detection

Full brightness on occupancy, auto dims to 25% when no one is around, using up to 70% less energy than other LED 2D replacements. (Optional)

ENERGY SAVING

Save up to 85% on your energy bill.

Our LED lamps produce the same quality of light as traditional lamps with only a fraction of the power.

ZERO MAINTENANCE

Once installed our lamps are maintenance-free, just fit them and forget them. Save around 90% on your maintenance costs.

50,000 HOUR LIFESPAN

That's 20 years if on for 7 hours a day or 11 years at 12 hours a day. So whatever your future holds, it's bound to be bright.

Technical Specification

DL Anti-Fogging

Nominal Power	Luminous Flux
